DETAILED ACTION

1. This communication is in response to the decision of the Board of Patents Appeals dated 09 March 2005. Claims 1-20 are pending in this application.

Allowable Subject Matter

2. Claims 1-20 are allowed for the reasons stated herein below.

3. The prior art of record (Dialog File 630: Times Staff and Wire Reports, "Trade-It-Yourself Bank Machines Make a Debut – Securities: Citibank is first to offer full-scale brokerage services at ATM machines. Option comes to California next month", Los Angeles Times Home Edition, Business Section, page 1, pt. D, col. 5, October 6, 1991 (LA times) and Mark Leon, "TP-monitor vendors spin Web features –NCR, IBM, BEA Systems enhance products to facilitate transactions over Web" Infoworld, Jul 1, 1996 (Infoworld)). LA Times discloses that Citibank offers an automatic teller machine (ATM) that lets users buy and sell stocks, get market values for securities, and trade shares of the bank's money market funds and the ATMs have separate menus for banking and brokerage services, and a screen that offers a choice between information or trading. By touching the screen, they can type in the name of the company or its ticker symbol and get a real-time stock quote or the previous day's mutual fund closing price." Infoworld discloses that NCR Corp. "is out to turn the Internet into a giant virtual cash register with enhancements to its Top End middleware that will let users deploy point-of-sale applications over the World Wide Web." NCR "delivered JAVA client to the Top End transaction processing (TP) monitor, a Web specific version of Top End designed to take advantage of the Internet and bypass weakness in standard Internet protocols",

Art Unit: 3624

and has "rewritten the Top End client code, which runs on PCs and sits inside automated teller machines and cash registers, as a set of JAVA class libraries".

Even though, the prior art of record discloses that Citibank offers an automatic teller machine (ATM) that lets users buy and sell stocks, get market values for securities, and trade shares of the bank's money market funds and the ATMs have separate menus for banking and brokerage services, and a screen that offers a choice between information or trading. By touching the screen, they can type in the name of the company or its ticker symbol and get a real-time stock quote or the previous day's mutual fund closing price" and turning the Internet into a giant virtual cash register with enhancements to its Top End middleware that will let users deploy point-of-sale applications over the World Wide Web." NCR "delivered JAVA client to the Top End transaction processing (TP) monitor, a Web specific version of Top End designed to take advantage of the Internet and bypass weakness in standard Internet protocols", and has "rewritten the Top End client code, which runs on PCs and sits inside automated teller machines and cash registers, as a set of JAVA class libraries", the prior art fails to disclose an automatic transaction machine including an output device, a currency sheet dispenser, and software which includes a browser and which during operation of the currency sheet dispenser is operative to provide an output through the output device responsive to a document accessed by the browser, a document accessed by the browser including instructions for causing the computer to operate the sheet dispenser discussed on pages 4-7 of the decision by the Board of Appeals dated 09 March 2005. For these reasons claims 1, 2, 4, 7, and 13 are deemed to be

Art Unit: 3624

allowable over the prior art of record, and claims 3, 5, 6, 8-12, and 14-20 are allowed by dependency.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
